

Notes

- 1- This companies' guide constitutes an entire image of the companies' financial data; the financial data with its details and footnotes can't be displayed as it appears on the companies' annual reports. Therefore, for standardization purpose, in the final layout of the guide for each sector (banks, insurance, service, industry) some items have been merged with other items. No guide can make a special layout for each individual company. Thus, please take this note in to your consideration when reading this guide.
- 2- The figures for shareholders structure and who owns 5% and more as of 31/12/2003.
- 3- The number of employees as of 31/12/2003.
- 4- Other information is according to the most recent available information.
- 5- Financial information is for fiscal years 2000, 2001, 2002 & 2003.
- 6- Companies' classification according to markets (first, second, third, not traded) as of 31/12/2003.
- 7- Cumulative data includes the companies who have financial data for the year 2002 and / or 2003. There are differences between the cumulative data for the year 2002 in this guide and that appeared in the previous issue, the reason behind this is the changes made by some companies to their financial data, and also some companies provided their annual reports after issuing the 2002 guide.
- 8- Only key financial figures in the balance sheet, income statements and cash flow are appeared in this guide.
- 9- For standardization purpose, the total current liabilities figure has been adjusted for some companies by subtracting the proposed dividends from it and adding those dividends to the shareholding equity.
- 10-
 - a) In the income statement, the depreciation and amortization

Item has not been used in the calculation of the net income because it is already included in other items such as cost of goods sold or other operational expenses.

b) For banks, the provision for credit facilities (period) item in the income statement has not been used in the calculation of the net income because it is already included in total operational expenses.

- 11- The market capitalization has been calculated using the number of subscribed shares not the listed shares at the Amman Stock Exchange.
- 12- Boards remunerations were not deducted in the calculation of the net income.
- 13- There are some differences between financial figures for the year 2000 & 2001 in this guide and those in the 2002 issue, the reason behind these differences, is the changes made by some companies for their financial data.
- 14- Total liabilities are calculated by subtracting total shareholders equity from the total assets.
- 15- Total other assets are calculated by subtracting the current assets and total fixed assets and long-term investments from the total assets.
- 16- Total other liabilities are calculated by subtracting the current liabilities, Long Term Loans & Notes Payable, Corporate Bonds from the total liabilities.
- 17- Other assets for banks are calculated by subtracting the Cash and Balances at Central Banks, Balances at Banks and Financial Institutions, Deposits at Banks and Financial Institutions, Trading Investments, Available for Sale Investments, Held to Maturity Investments, Net, Investments in Affiliates, Direct Credit Facilities, Net, and Fixed Assets, Net from the total assets.
- 18- Total other liabilities for banks are calculated by subtracting Customers Deposits, Banks, Financial Institutions Deposits, and Cash Margins from the total liabilities.
- 19- Total other assets for Insurance are calculated by subtracting the cash on hand & at banks, post dated cheques, accounts

receivables/net, insurance companies accounts receivables, total investments and fixed assets/net from the total assets.

- 20- Other operational expenses include any other indirect operational expenses plus the depreciation and allowances for doubtful account and allowances for slow-moving inventory.... etc.
